

## Credit Lyonnais

London

CASE STUDY 29

Woodchester Finance, part of Credit Lyonnais, approached Creed Miles to refurbish the reception area in their building in the London Docklands.

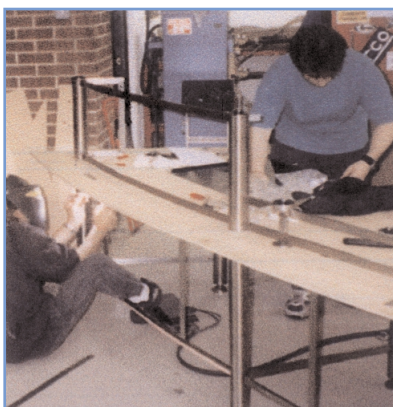

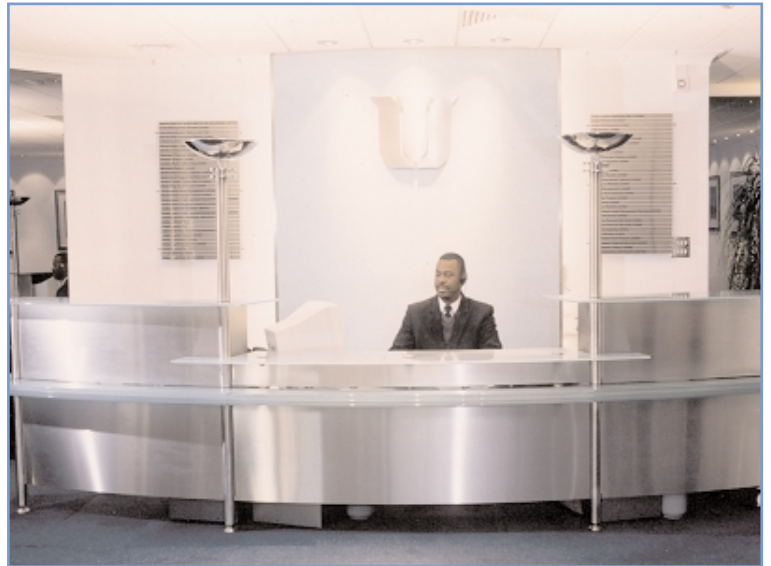

### THE BRIEF

The main part of the brief was to design and construct a bespoke reception counter which would be an impressive focal point of the area, along with floor coverings and additional fixtures and fittings.

### SOLUTION

Taken from the architect's drawings, the 5.6m long, curved reception desk with integral lighting and made from brushed stainless steel and etched glass, was constructed and installed within five weeks. Matching planters and coffee tables were added with complementary floor coverings and window treatments to great effect. The result - a dynamic reception area to impress clients and staff alike.

The illustration show part of the construction process and detail of the materials used.
