

Limehouse

London

CASE STUDY 32

Creed Miles & Co were asked to provide furniture to complement the newly designed offices of the highly successful Limehouse Company.

THE BRIEF

Furniture styles and storage solutions were requested for the reception area, board room, break-out area and the Managing Director's office suite.

THE SOLUTION

The break-out area was designed to be a multi-purpose area that could be easily re-configured at a moment's notice. Concertina screens were chosen for their manoevrability, along with cafe style tables and chairs, LCD screens and a full-size pool table.

Simplicity and clean lines was the theme of the reception area, featuring an impressive reception counter, complete with Task chairs, leather sofas, glass coffee tables and floor standing lamps.

Ergonomic design and functionality was paramount within the Managing Director's suite, due to his recent spinal injury. This was addressed by a range of electrically operated, fully height adjustable furniture and operator's chair in a maple veneer.

Creed Miles also supplied Task chairs, meeting tables and storage systems.
